About us

Novellini is a longstanding European leader in the creating of stylish, high performance Shower Products, featuring innovative design, quality construction and premium materials since the 70's.

However little or big our bathroom may be, it's there where we take care of our figure and appearance.

Among the uncountable solutions that the market is offering, Novellini surely locates itself as a leader company, tendering a large range of sizes on every product range as well as the possibility to produce "made to measure" products in special sizes.

The product range includes, besides Shower Enclosures and Shower Trays, also Wellness Products, such as the completely Equipped Steam Cubicles, Baths and Whirlpools and Equipped Shower Panels.

The yearly production of Shower Enclosures is established on millions of units, whereas that of Wellness Products reaches the ninety thousand units.

The Novellini group employs today globally 1050 workers, who are active in the Italian

head offices and production facilities and in the European branches in France, England, Holland, Belgium, Poland, Austria and Germany.

Integration and automation are the two key-words that mark out the production cycle of the company: starting from basic commodities up to the finished products the whole production process takes place inside the Novellini production sites.

In 2002 the company inaugurates the new aluminum foundry plant, that up to now is still the only one in the province of Mantua. The plant is located beside the extrusion unit and supplies its two extrusion lines, that were active from before.

Recently a brand new warehouse has been activated. With its capacity up to 100.000 Shower Enclosures, it permits fully automatic storage, classification and picking of the goods.

The production process is constantly kept under control in every step. The different production units dispose of automatic control and quality evaluation devices not

only for the semi manufactured products (life tests, uniformity of glass decoration and dimensional checks) but also of the single processes (extrusion and painting of the profiles and grinding and tempering of glass).

Assembling is mainly performed by robots that grant a constant qualitative work and high productivity.

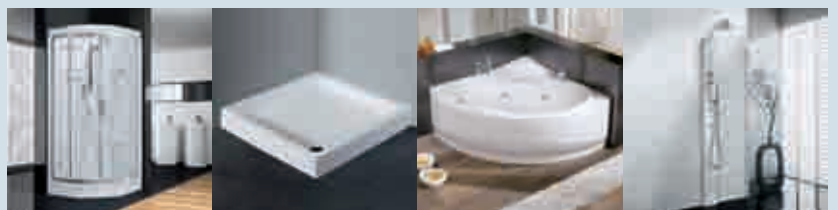

Statistical sample checks in the different production units, with consequent product inspection and evaluation represents the daily activity of the quality control department, which is effectively promoting a total quality policy. Good results have already been achieved in the after sales, with a decrease of call-rate, but also on the production process, for increasing its efficiency.

The innovative and diffused logistic organization of Novellini group, allows to warrant very fast deliveries all over Europe. High production capacity goes along with great distribution level, so as to achieve a high customer satisfaction level.

'70 Novellini starts as a little Italian artisan company, specialized in producing wrought iron and aluminum doors and window frames.

'80 In these years Novellini becomes more and more important on the European market with a large production increase of Shower Enclosures.

'90 The Novellini product range is being enriched: production start of Whirlpools, Complete Cubicles, Equipped Shower Panels, Shower Trays.

2000 Innovation is not limited to the production area but extended to the entire structure, "Novellini store", the commercial internet site in which the different types of professional categories may consult on line the product catalogue, stock availability and order the articles they need on line.

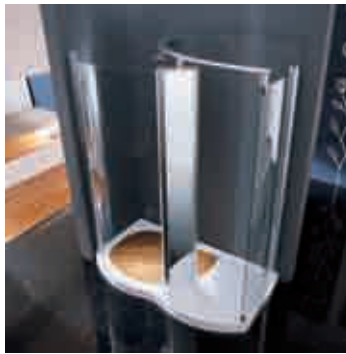

2007 Novellini creates the high-range collection "Elysium". This new product line merges a contemporary and essential design with the echo of the Italian decorative arts' artisan masters.

YOUNG

Simply elegant,
simply at ease.

- Antibacteria profile in primary aluminum.
- Available in PVD Chrome, Bright Silver or White.
- Safety Tempered glass 6 mm thickness.
- Available with receptor or for wet floor solution.
- Slim elegant Chrome handles.
- Wide selection of sizes and shapes for a more customized solution.

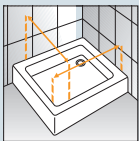

ITALIAN TECHNOLOGY AND MANUFACTURING 

Novellini

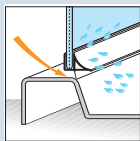

Safety glass complying with European Standards UNI EN 14428.

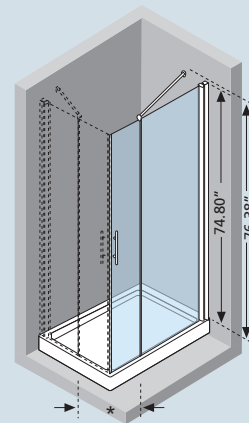

HOW TO TAKE THE MEASUREMENT

** Measurements must be taken from the wall to the internal edge of the shower tray, and do not correspond to the actual dimensions of the shower cubicle.

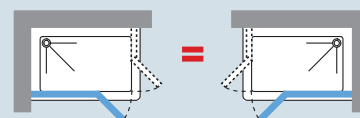

If you are not fitting the optional splash guard, you must mount the panel on the inside edge of the shower tray.

COMPLETE CUBICLES

LIGHT

Complete shower cubicle with the ultimate source of steam. The research of material and the clean design, make this 4 glass panel shower steam room the perfect step to a perfect shower – quality relax time.

- Antibacteria profile in primary aluminum.
- Available in PVD Chrome, Bright Silver or White.
- Safety Tempered glass 6 mm.
- Slim elegant Chrome handles.
- Possible to upgrade from basic Hydro version to complete shower system with steam.
- Easy-Clean Doors.

New **Novellini** **profile** finishes

Antibacterial

Novellini has chosen paints enriched with silver - and zeolite - based additives for its finishes, which are capable of preventing the proliferation of bacteria, moulds and fungi on the surfaces. Our paints are laboratory-tested using the JIS Z 2801:2000 method and, compared with traditional paints, guarantee a more than 99% reduction of the most common bacterial organisms (*Staphylococcus aureus MRSA* and *Escherichia coli*).

Anti-mould

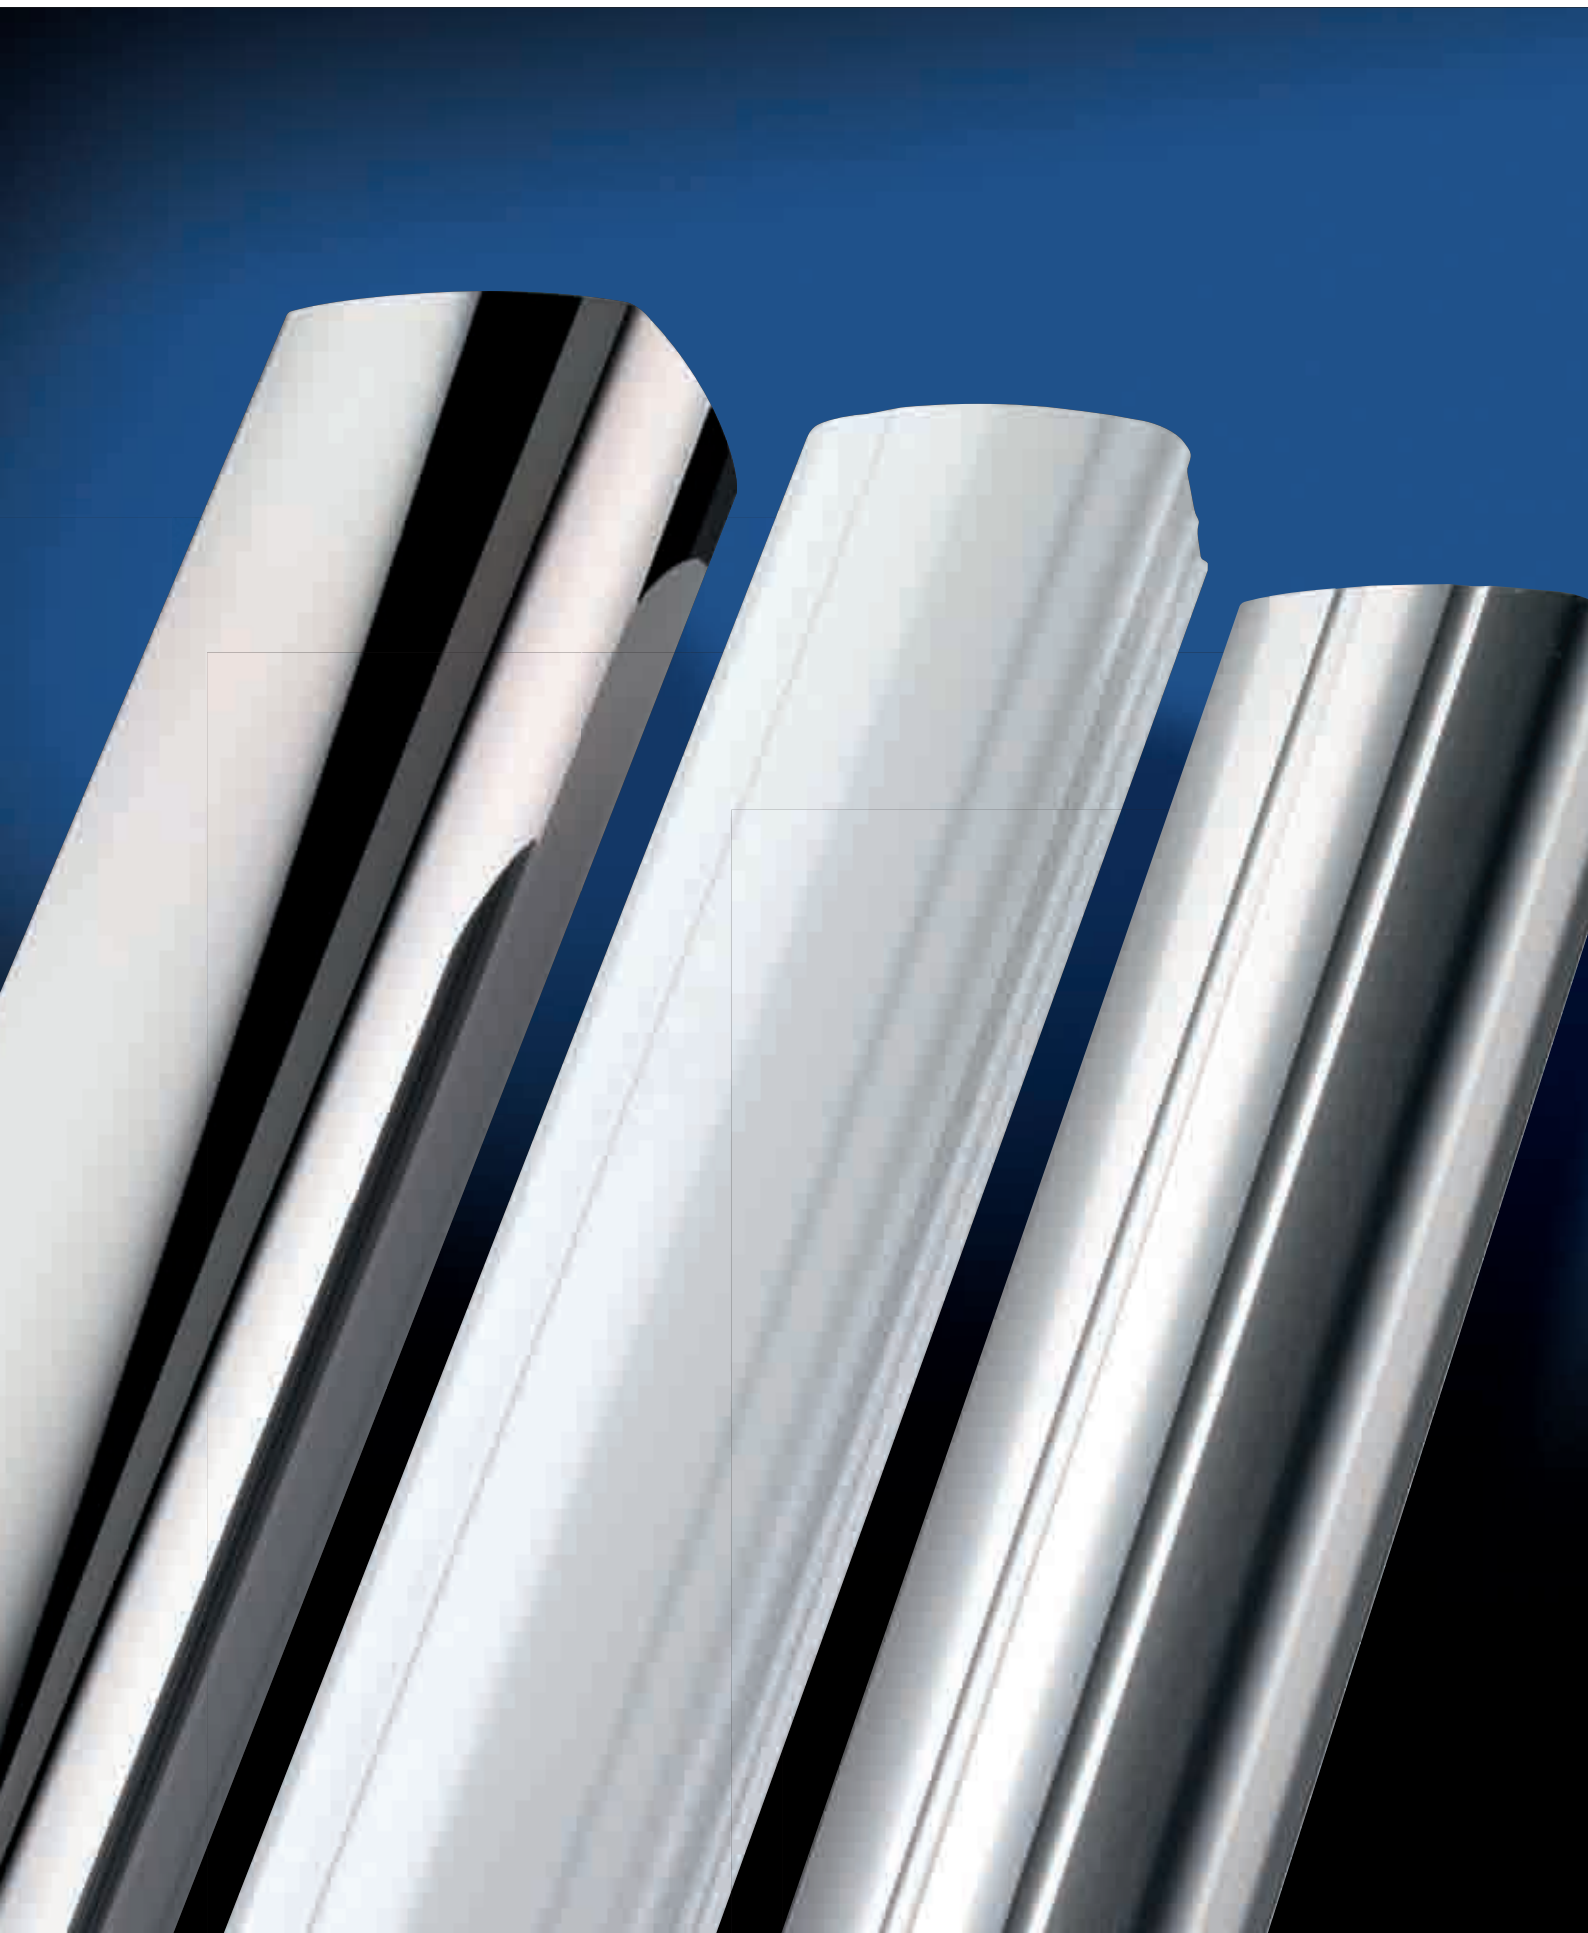

Ecological

Novellini's finishes are state-of-the-art in terms of quality and environmental safety and stand out for the total lack of heavy metals (chromates, lead, etc.) and aromatic amines in the paints. In addition, the aluminium - which is completely recyclable - used to make the profiles, guarantees a production cycle with an extremely low impact on the ecosystem.

PVD CHROME
The New
Ecological
Finish

The latest news in terms of quality and environmental safety is the adoption of the innovative PVD vacuum metallisation process.

This is a procedure used to plate surfaces with various types of metal, avoiding traditional, highly polluting galvanisation. After the metal plating has been carried out, it is finished off with the application of an exclusive coating giving the product superior shine, excellent antibacterial properties and greater resistance to abrasion, as well as obstructing the formation of water drops on the chrome surface.

Guarantees Terms and Conditions

HYDROMASSAGE BATHS

Hydro-massage baths conform to the following European directives: **EEC 73/23, EEC 89/336, EEC 2004/108.**
Amendments: **EEC 92/31, EEC 93/68.**

With reference to harmonised standards:

PAINT CHARACTERISTICS

Coatings are QUALITAL certified (industrial aluminium certification association operating throughout Europe) with QUALICOAT license No. 748 dated 04/11/1999.

SAFETY GLASS

Tempered safety glass in accordance with European standards. **UNI EN 14428:2005, EN 12150-1-2, EN 14428**

Shatter-proof or in the event of breakage the glass shatters into very small non-hazardous pieces.

GLASS BREAKAGE TEST →

Warranty terms

This guarantee is provided according to product liability directive CEE 85/374 concerning liability for defective products, for products sold in the EU countries.

NOVELLINI S.P.A. guarantees its products against defects of manufacture and material for a period of **24 months**, subject to proof of purchase, from the date of purchase appearing on the sales receipt or tax invoice, such period never to exceed 30 months from the date of the manufacturing test, and only where such defects are found or confirmed by personnel authorized by the Company.

The guarantee is restricted to repairing or replacing the parts found to be defective.

The guarantee does not include replacement of the entire product.

The guarantee does not cover costs of disassembly and reinstallation.

The guarantee does not include lights, pilot lights, fuses, parts made of glass, mirrors, trimmings or any parts found to be defective as a result of negligence or neglect, incorrect installation or maintenance, tampering by unauthorized personnel, or damage due to transport or any other reason not directly linked to a manufacturing defect, such

as, for example, corrosion or any unfavourable conditions deriving from that can be attributed to the nature and quality of the water and electricity supply in the building where the product is installed.

The purchaser is responsible for checking that the product is in good condition prior to installation.

NOVELLINI S.P.A. declines any responsibility for damage, whether direct or indirect, to persons, animals or things arising out of failure to observe the instructions contained in the installation, use and maintenance manual that accompanies the product.

ALL PRODUCTS ARE INSURED FOR CONSUMER PRODUCT LIABILITY. ACCORDING TO THE EEC DIRECTIVE NO. 374 OF 1985, WITH ITAS-TRENTINO ALTO ADIGE INSURANCE COMPANY - TRENTO.

NOVELLINI GROUP OPERATES A POLICY OF CONTINUOUS DEVELOPMENT AND IMPROVEMENT.

WE RESERVE THE RIGHT TO CHANGE PRICES AND SPECIFICATIONS WITHOUT PRIOR NOTICE.

environment & safety

To instill a green Philosophy in the minds of suppliers and also of the Group members is one of the main missions Novellini pursues.

The basic idea has always been to be the most important European firm being able to give a friendly alternative to shower curtains (PVC) with shower enclosures (aluminium and tempered glass).

The continuous research for “Green Production” methods is for us the only solution to obtain a “Green Product”.

Green Production

“Zero-emissions” integrated cycle. Greatest respect for the environment both during the raw materials manufacturing (aluminium foundry, styrene sheet extrusion) and the product assemblage and packaging.

Integrated cycle with a total recycling of scrap materials:

100% of aluminium profiles rejected during the internal cycle are recycled in the foundry;

100% of glass rejected during the internal cycle is recycled with the most important glass manufacturing companies;

100% of plastic pieces rejected during the internal cycle are ground and used for packaging components;

100% of shower enclosures or hydromassage products damaged during the manufacturing phases, are ground by an automatic system which splits aluminium, glass, plastic, carton and other materials, to recycle the single material.

The Novellini logo, featuring the name "Novellini" in a white, elegant cursive script on a dark blue background.

Professional Installation Coverage for Novellini Distributors and Dealers

Novellini manufactures a variety of high-quality bath products, shower enclosures and related accessories. In order to ensure the highest levels of customer satisfaction, Novellini has partnered with PlusOne Solutions to provide distributors and retailers with a professional network of installers that is available throughout North America. PlusOne has extensive installation coverage in the United States and Canada, with coverage growing every day. With PlusOne, Novellini is able to provide immediate installation and product warranty support to distributors and retailers. The goal is to exceed end-customer service expectations and provide Novellini's North American dealer network with best-in-class service and support.

Reduce Liability while Increasing the Quality of Installation Services

PlusOne's installers are hand-selected to ensure only the most qualified installers in North America for bath, kitchen and home appliance installations are dispatched to the homes of end-customers. PlusOne conducts extensive criminal background screens on every installer, and ensures all relevant insurances and licenses are current. This scrutiny results in highly professional and knowledgeable installers, and reduces the liabilities associated with sending an unknown installer into a customer's home.

PlusOne will work with Novellini's dealers to coordinate the scheduling, dispatch, payment and end-customer interface for each installation or warranty service event. If desired by the dealer, PlusOne will interact directly with end-customers to ensure the installer was timely, professional, and that the product is installed to the customer's satisfaction. PlusOne will handle all installer billing payments and invoice processing, and will conduct end-customer surveys as deemed appropriate by both Novellini and a dealer.

Installer Training Reduces Product Returns and Improves Customer Satisfaction

In addition to extensive screening and dispatch services, PlusOne ensures installers are properly trained on Novellini's products. PlusOne requires every installer in their network to participate in continuous Novellini product and bath installation "best practices" trainings. PlusOne has learned that successful installations of high-end shower and bath products require more than basic contracting skills. Complexity is the norm for installations of high-end bath products. This level of installation requires detailed knowledge of fundamentals that are specific to custom bath installations - proper pre-measurement, caulking, trim and customer interface skills are examples of these critical skills. Lack of bath-specific installation expertise increases the likelihood of common installation mistakes. These mistakes, in turn, result in higher product returns to dealers, distraction of dealer resources from new sales activities, and unhappy customers. Unprofessional customer interaction skills result in a degradation of the customer's perception of both the dealer and the product. PlusOne has proven that the combination of highly qualified installers and consistent product and "soft skill" training significantly reduce product returns and increase customer satisfaction.

These critical factors are the primary reason that Novellini is partnering with PlusOne to recruit, train, certify and dispatch installers throughout North America. By working with PlusOne, Novellini's dealer network will experience reduced product returns, increased customer satisfaction, and reduced costs associated with recruiting, managing and training a certified network of local installers. Novellini's distributors and retailers can have immediate access to PlusOne's professional, trained independent contractor network as part of a distribution partnership with Novellini.

PlusOne SERVICES

FieldService PLUS

- Professionally trained installers to conduct pre-measure, installation and warranty service for Novellini products
- Extensive network of certified and screened installers to serve customers and dealers throughout North America
- On-demand installer recruiting within PlusOne's established network of 45,000 service providers for emergency installation or warranty service events

Compliance PLUS

- Rigorous screening process for installers that includes extensive criminal background screens, driving record and employment verification, and optional drug screens
- Verification, collection and maintenance of relevant insurance, licensing and training documentation to reduce liability to dealers

Knowledge PLUS

- Professional product and customer service training solutions that focus on unique skills required for complex installation service activities
- Availability of 24/7 online training platform for Novellini products that reaches all geographies, provides comparable training to onsite workshops, and is cost-effective

Accelerating the Business of Service

PlusOne enables service organizations to improve the quality and coverage of their service provider networks. Specifically, they focus on critical areas that directly impact the quality of the end-customer experience while reducing the costs associated with delivering exceptional customer service.
